

APPENDIX A

The following is a replacement ABSTRACT OF THE DISCLOSURE

CHARGE PROCESSING DEVICE, CHARGE  
PROCESSING SYSTEM AND CHARGE

ABSTRACT OF THE DISCLOSURE

---

cb A system for charge processing tolls and the like. A vehicle mounted device detects the position of a vehicle 32 using GPS, and transmits position information via a wireless channel to a central station. The central station performs charge processing (calculation) for an area in which a charge is applied based on the position of the vehicle, and transmits the charge to the vehicle mounted device . The vehicle mounted device collects a toll from a prepaid card or IC card or the like on the basis of the received charge processing result.
